

July 17, 1930.

Mr. Albert Coleman,
Boulder, Utah.

Dear Sir:

RE: BOULDER ADJ.

I have your letter of July 14 concerning the trouble which you are having in obtaining water and would say that it is difficult for me to be of any assistance in a locality where I have not a water commissioner acting under me.

I understand that efforts may be started by the water users on Boulder Creek to form a corporation and straighten out the general situation. If steps in this direction are continued it should result in a proper division of water and apparently in taking care of all the present requirements.

If the water users in your locality are questioning your right to the use of water it may possibly be advisable for you to make a filing in this office. This would not do away with the difficulty of my not having a local man but it is possible that the other water users would respect such a right more than they do your condition at present.

Yours very truly,

State Engineer.
